

## ECO-QUICK GEL

---

### **PRODUCT DESCRIPTION**

Eco-Quick Gel is a super absorbent polymer that can hold up 500 times its weight. It is meant to absorb water-based waste and comes in a granular form. ECO-QUICK Gel meets all EPA regulations for proper disposal methods. 20 grams per gallon of treated material will create a gel like substance within minutes that is safe to dispose of in any standard waste container.

### **PRIMARY USES**

Eco-Quick Gel can absorb any water-based waste. Perfect for concrete slurry and excess waste water. It is designed to dehydrate the waste water and encapsulate the liquid inside the granules. Safe to use indoors and outdoors.

### **ADVANTAGES**

- EPA Compliant
- Fast Acting
- Super Absorbent
- Easy To Use
- 100% Organic
- Non-hazardous

### **COVERAGE RATE**

Eco-Quick Gel will yield approximately 200-300 square feet per pound. Do test area to determine exact coverage. This coverage rate only applies towards a floor application.

### **APPLICATIONS**

*For contained liquid waste:* add (1) cup or 12 ounces of Eco-Quick Gel to 5 gallons of liquid waste. Mix well with a drill mixer or shovel. Let it set for 30-40 minutes to completely solidify.

*For a floor application:* 50 lb. box of Eco-Quick Gel will cover 10,000-15,000 square feet. Lightly cover liquid waste with a thin layer of Eco-Quick Gel. Let it set for 5-10 minutes. Work Eco-Quick Gel into liquid with a stiff broom or squeegee until liquid waste is absorbed.

### **DISPOSAL**

Once liquid waste is completely dry and solidified with Eco-Quick Gel, it is safe to throw away in any standard waste container.

### **LIMITATIONS**

Solidifying a hazardous liquid waste with Eco-Quick Gel does not make it non-hazardous. If the waste is hazardous, the resultant is still hazardous. Must comply with all local, state, and federal environmental regulations when disposing of this product.
